

Praying Mantis

The Praying Mantis is a symbol of cunning and power in Japanese culture and is consequently a highly respected theme in Samurai swords. Built on our L6/Bainite blade (detailed at right) in the Shobu Zukuri style with Bo-Hi, and featuring superb Koshirae, the Praying Mantis is a very desirable and functional piece. The subdued green silk Ito and deep brown of the lacquered Saya provide handsome contrast to the dark copper and golden accents of the Tsuba, Fuchi and Kashira. The stalking mantis lies in wait for his next prey, mirroring the power and grace in this exceptional Katana.
