

Sitka
KH2527

Blade Style **Spear**
Blade Length **3"**
Thickness **1/8"**
Closed Length **4 1/8"**
Handle Material **Rosewood**
MSRP **\$176.00**

Denali
KH2524

Blade Style **Drop Point**
Blade Length **3"**
Thickness **1/8"**
Closed Length **3 7/8"**
Handle Material **Rosewood**
MSRP **\$76.00**

Glacier
KH2525

Blade Style **Clip Point**
Blade Length **3 1/4"**
Thickness **1/8"**
Closed Length **4 1/4"**
Handle Material **Rosewood**
MSRP **\$76.00**

Saguaro
KH2526

Blade Style **Spear**
Blade Length **3"**
Thickness **1/8"**
Closed Length **4 1/8"**
Handle Material **Rosewood**
MSRP **\$76.00**

Padre
KH2528

Blade Style **Drop Point**
Blade Length **3"**
Thickness **1/8"**
Closed Length **4 1/8"**
Handle Material **Stabilized Leather**
MSRP **\$56.00**

Teton
KH2529

Blade Style **Clip Point**
Blade Length **3 1/4"**
Thickness **1/8"**
Closed Length **4 1/4"**
Handle Material **Stabilized Leather**
MSRP **\$56.00**

Kobuk
KH2530

Blade Style **Spear**
Blade Length **3"**
Thickness **1/8"**
Closed Length **4 1/8"**
Handle Material **Stabilized Leather**
MSRP **\$56.00**

ROCK CREEK KNIVES

Hanwei's introduction of its "Rock Creek" brand of knives marks a commitment to producing knives with the same standards of quality and innovation as its renowned line of swords. Owner and former custom knife maker Paul Chen's many years of knife design and knifemaking experience, combined with Hanwei's steelmaking and forging capabilities, form the ideal background for the venture. A limited selection of models is included in this brochure and others, currently in development, will be available shortly.

Eland

KH2512

Blade Style	Clip Point
Blade Length	6"
Thickness	1/4"
Overall Length	10 5/8"
Handle Material	Stacked Leather
MSRP	\$129.00

Oryx

KH2510

Blade Style	Clip Point
Blade Length	6"
Thickness	1/4"
Overall Length	10 5/8"
Handle Material	Stacked Leather
MSRP	\$129.00

Sable

KH2511

Blade Style	Drop Point
Blade Length	6 1/4"
Thickness	1/4"
Overall Length	10 3/4"
Handle Material	Stacked Leather
MSRP	\$110.00

Nyala

KH2513

Blade Style	Drop Point
Blade Length	4 1/2"
Thickness	1/4"
Overall Length	9"
Handle Material	Stacked Leather
MSRP	\$106.00

Kudu

KH2514

Blade Style	Nessmuk
Blade Length	4 1/4"
Thickness	3/16"
Overall Length	8 3/4"
Handle Material	Stacked Leather
MSRP	\$106.00

Impala

KH2515

Blade Style	Trailing Point
Blade Length	4"
Thickness	3/16"
Overall Length	8 1/4"
Handle Material	Stacked Leather
MSRP	\$110.00

Waterbuck

KH2516

Blade Style	Gut-Hook
Blade Length	4"
Thickness	3/16"
Overall Length	8"
Handle Material	Stacked Leather
MSRP	\$110.00

Springbok

KH2517

Blade Style	Drop Point
Blade Length	3 1/2"
Thickness	3/16"
Overall Length	7 3/4"
Handle Material	Stacked Leather
MSRP	\$99.00

Steenbok

KH2518

Blade Style	Drop Point
Blade Length	3"
Thickness	3/16"
Overall Length	7 1/2"
Handle Material	Stacked Leather
MSRP	\$99.00

Bushbuck

KH2519

Blade Style	Trailing Point
Blade Length	4"
Thickness	3/16"
Overall Length	8 1/4"
Handle Material	Stacked Leather
MSRP	\$99.00

Acadia

KH2522

Blade Style	Drop Point
Blade Length	2 3/4"
Thickness	1/8"
Overall Length	3 1/2"
Handle Material	Mother of Pearl / Abalone
MSRP	\$270.00

Mesa

KH2523

Blade Style	Drop Point
Blade Length	3"
Thickness	1/8"
Overall Length	3 3/4"
Handle Material	Mother of Pearl / Abalone
MSRP	\$270.00

All ten models in the current fixed blade series have forged blades in HWS-1, a high-alloy steel proprietary to Hanwei, with an edge hardness of 58 - 60HRC and excellent corrosion resistance, edge-holding and ease of sharpening. The blade thickness is either 3/16" or 1/4", depending on blade length and the blades are flat or saber ground as appropriate. An aggressive thumb grip is provided on the back of each blade and finger grooves

are provided at the choil of certain skinner/caper models for blade control. Tangs are very substantial, terminating in a short thread at the pommel. The stacked-leather handles are secured by a sleeve nut at the pommel. The guards and pommels are investment cast in stainless steel. Sheaths are made in bark-tanned leather with stainless steel reinforcing at the wear points and are either pouch-type or have strap-and-snap retainers.

The current folder series comprises nine lockback models. The blades are forged in either HWS-1 or HWS-2, another high-alloy steel proprietary to Hanwei, formulated for toughness, abrasion resistance (edge-holding) and corrosion resistance. The blades are ground from forged 1/8" stock, hollow ground for easy edge maintenance.

Edge hardness is 58 - 60 HRC. The frames are built in solid stainless steel with various handle treatments. Four models feature removable pocket clips of Hanwei's own design and three have bails for belt-clip attachment. An innovative feature on certain models is the use of Hanwei's electroformed engraving.
